ASX Announcement **22 September 2025**

INITIAL FIELD WORKS APPROVED – AUCU GOLD-COPPER PROJECT

Triton Minerals Limited (ASX: **TON**) ("Triton" or "the Company") is pleased to advise initial field works at the Aucu Gold-Copper Project in Tete Province, Mozambique, will commence in October 2025, following the recent approval of the project's exploration Licenses [1]. The program will run for approximately six weeks and will be managed by Triton's geological team with the support of local field staff based in Tete.

The scope of works will include:

- Project setup, logistics and community liaison;
- Review and integration of historic Mozambique Government geophysics data;
- Site mapping, rock chip and soil sampling;
- RC target selection and approximately 1,400m of RC drilling across an estimated five priority targets;
- Geological compilation and interpretation of results.

Drilling will be completed using locally available rigs in Tete, with assays to be processed regionally to ensure timely turnaround.

Next Steps

The field program is expected to take six weeks, with assays anticipated within three weeks of completion. This timetable allows for initial results to be reported in early December 2025, ahead of the onset of the wet season in Mozambique. Results from the program will be released to the market once available and will form the basis for follow-up exploration in 2026.

FOOTNOTES

1. **ASX Announcement: 23 July 2025:** Approval of Exploration Licenses for Aucu Gold-Copper Project

The ASX announcement was authorized for release by the Directors of the Company.
